

National Environmental Policy Act Support Services - Environmental Impact Statements and Environmental Assessments

McVehil-Monnett Associates, Inc. (MMA) provides air quality support for National Environmental Policy Act (NEPA) actions of Environmental Impact Statements (EISs) and Environmental Assessments (EAs). We team with industry, governmental agencies, and engineering and environmental companies that are involved in the generation of EISs or EAs.

MMA provides air quality dispersion model impact analyses, climate summaries, air quality and meteorological monitoring support and data summaries, regulatory applicability analyses, climatological descriptions, and other air quality assessments needed for an EIS or EA.

MMA is experienced in writing the meteorological, climatological and air quality related sections of the EIS or EA. We also review, assess and summarize the modeling analyses, background data selection, and other technical aspects of air quality analyses performed by other companies.

We would like the opportunity to talk to you about our services. Please call us at (303) 790-1332 to discuss your specific needs.
